

BONAVITA 1900 SERIES BREWER

1. MEASURE THE COFFEE

- Measure out 65 grams of coffee - that's about a 5/8 cup (It might be easier to underfill a 3/4 cup scoop) of whole bean coffee
- Add 1L or 1000g of room temperature water to your brewers reservoir. It will heat itself up.

2. GRIND THE COFFEE

- Grind your 65 grams of coffee on a medium setting. It will resemble the size of sand.
- Place ground coffee into the brew basket with a filter.
- Place carafe under brew basket.

3. START THE BREWING

- Press the button to start.

4. FINISH THE BREWING

- After it's finished, the light will turn off and your brew will be ready.
- Remove paper filter with coffee grounds and dispose.

5. ENJOY!

- Add pouring spout lid and pour into your favorite mug.
